ELECTION AND RESPONSE TO RESTRICTION REQUIREMENT

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Restriction Requirement mailed November 26, 2003, the Applicants hereby elect with traverse **Group I, claims 1-13**, drawn to a wear resistant member.

The traverse is on the grounds that the Office has not met its burden of establishing that the claims of Group II are patentably distinct from those of Group I. The Restriction Requirement indicates that the wear resistant member of Group I comprising a silicon nitride sintered body may be made by an alternative method of sintering elemental silicon. However, the Restriction Requirement does not indicate how such a method involving sintering elemental silicon would form a member comprising sintered silicon nitride. Moreover, the Applicants submit that no undue burden would be imposed on the Office in the examination of the claims of Groups I and II together due to the similarity of the subject matter encompassed by each group.

In the event that the requirement is maintained, the Applicants respectfully request that upon an indication of allowability for the claims of elected Group I, that the claims of

non-elected Group II which depend from or include all the limitations of those of Group I, be rejoined to the elected group, see MPEP 821.04.

Respectfully submitted,
